Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed the differences between the claimed invention and the applied prior art. Specifically the Applicant argued how the "medical logging" step of the claimed invention was different than the medical logging of the applied prior art. The Examiner held that the prior art did teach the recited features by giving the "medical logging" step its broadest reasonable interpretation. The Examiner suggested claim language that would more clearly distinguish claimed invention over the prior art. Examiner noted that while other arguments and/or amendments may be presented in order for Examiner to reconsider the applied prior art of record, any amendment requiring further search and/or consideration will not be entered.
